

## TITLE PAGE

- **Problem Statement ID** : SIH1609
- **Problem Statement Title** : Implementation of the Alumni Association platform for the University/Institute.
- **Theme** : Smart Education
- **PS Category- Software/Hardware** : Software
- **Team ID** :
- **Team Name** : Black Fungus

## Solution :

Web application for Enhance Alumni ,  
student and teacher engagement for  
strong **connection** and **career growth**

Provide philanthropic support for  
managing **donations**, organizing  
**workshops** and **reunions**, and  
facilitating **mentorship** programs.

**Career advancement** and  
**knowledge sharing** among  
students and alumni

Dynamic and supportive ecosystem where  
alumni can **connect**, **contribute**, and  
**thrive**, thereby enriching the  
overall educational experience and  
legacy of the institution.

# FEASIBILITY AND VIABILITY

## Feasibility :

### Technical Feasibility

The platform supports functionalities like networking, donations, job postings, and knowledge sharing using current technology and tools.

### Operational Feasibility

The platform supports functionalities like **networking, donations, job postings**, and knowledge sharing using current **technology** and **tools**.

### Economic Feasibility

Building a supportive **alumni community** could lead to increased **donations**, which would provide financial returns or benefits to the organization

### Legal and Ethical Feasibility

It ensures privacy, data protection and transparency for alumni and follows all relevant legal frameworks.

### Challenges

**User Engagement :**  
Low participation rates from Alumni.

**Platform Privacy :**  
Ensuring trust and use.

**Platform Usability :**  
Intuitive interface creation.

**Platform Adoption :**  
Getting alumni to use the platform regularly.

### Risks

Limited community building.

Data security, losing data.

Complex design reduces usage.

Alumni may avoid or lose interest.

### Solutions

Premium version with direct student-alumni interaction, offering alumni profit to boost participation.

Encryption, secure login.

Simple, user-centric design.

Send personalized notifications and events.

## Viability :

### Business Viability

Building a vibrant alumni community can boost the college's reputation, attract donations, and enhance alumni participation, supporting financial sustainability

### Market Viability

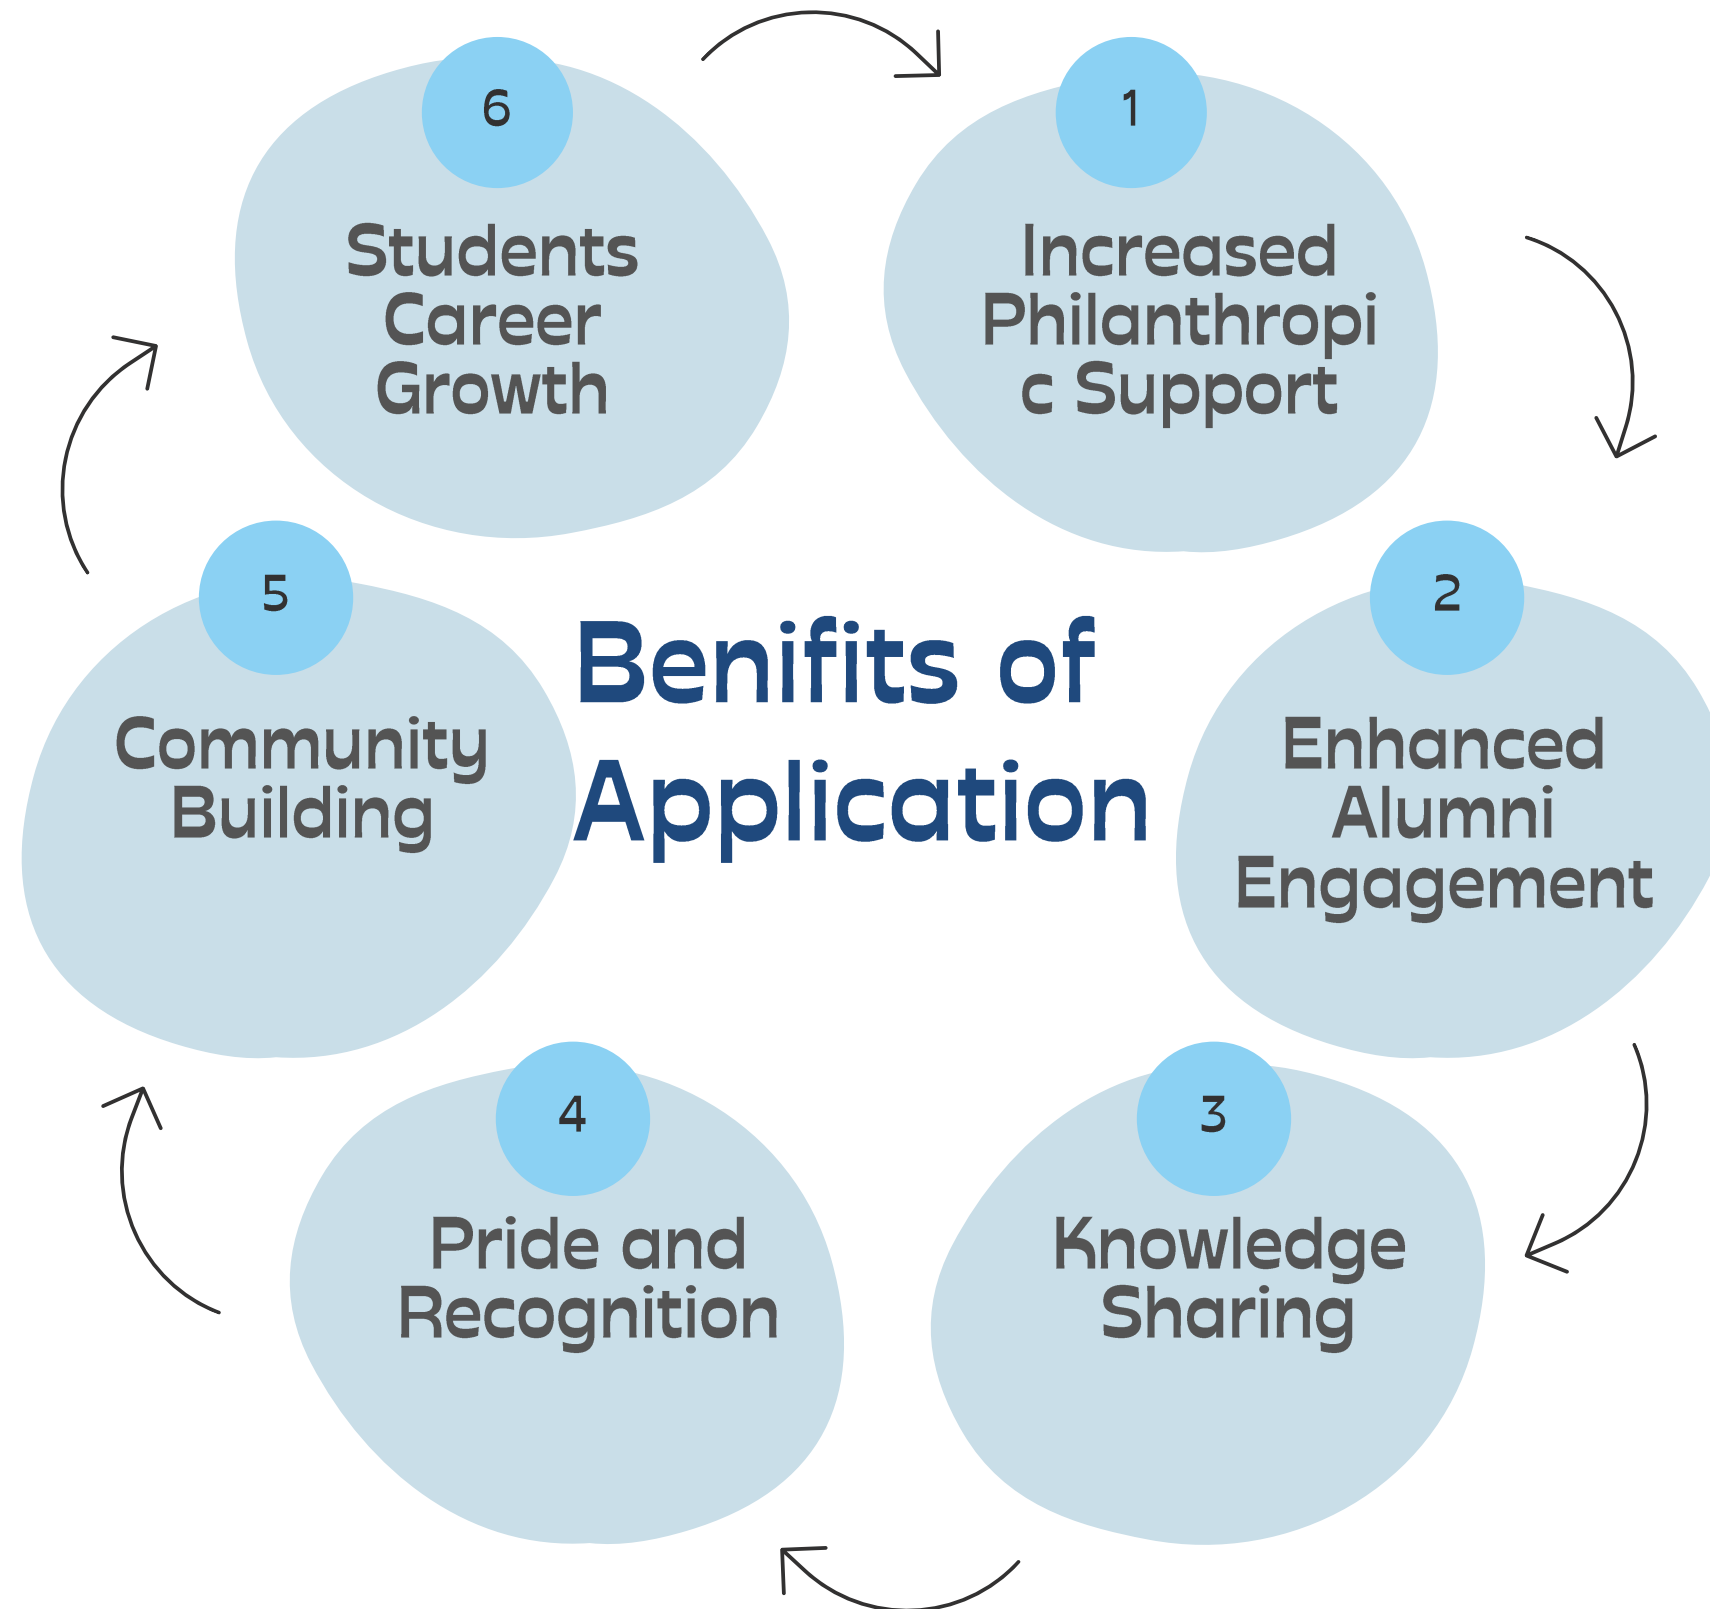

By offering unique features such as AI-driven recommendations and chatbot the platform differentiates itself from existing solutions.

### Financial Viability

The project has the potential to generate revenue through donations and possibly by offering premium features or services.

# IMPACT AND BENEFITS
